Md. Mahabub Hasan Mahin

Computer Science Undergraduate | Aspiring Software Engineer | Competitive Programmer
Narayanganj, Bangladesh | +880 1722-294727 | mahabubhasanmahin231@gmail.com
GitHub | LinkedIn | LeetCode | Codeforces | Portfolio

Professional Summary

Computer Science and Engineering undergraduate at Green University of Bangladesh targeting backend and full-stack software engineering roles. Solved 250+ algorithmic problems on LeetCode and Codeforces, with practical experience building full-stack web applications, Linux automation tools, and computer vision pipelines in Python.

Technical Skills

Languages: C++, Java, Python, C, JavaScript, PHP, SQL, Bash

Web & Frameworks: Flask, Django, REST APIs, JWT, Firebase, HTML5, CSS3

AI / ML: OpenCV, PyTorch

Databases & Tools: MySQL, MongoDB, PostgreSQL, Git, GitHub, Linux/CLI

Core Concepts: Data Structures & Algorithms, Object-Oriented Design, Multithreading, Relational Schema Design

Projects

CipherVault – Zero-Knowledge Encryption Vault | Flask, MongoDB, Web Crypto API GitHub

- Built zero-knowledge client-side encryption using Web Crypto API (AES-256, RSA) to secure files before upload.
- Developed a Flask REST API with JWT authentication, MongoDB Atlas, and expiring share links.

AI Face Age Detection | Python, Flask, OpenCV, PyTorch, PostgreSQL GitHub

- Built a multi-face age estimation pipeline using OpenCV DNN and a PyTorch model trained on UTKFace.
- Integrated a Flask web interface with PostgreSQL and Cloudinary for image processing and inference logging.

Smart Safety Awareness Network (SSAN) | JavaScript, Firebase, Supabase, Leaflet.js GitHub

- Developed an emergency response app featuring live GPS SOS broadcasting and interactive Leaflet.js maps.
- Integrated Firebase for push alerts and database, paired with Supabase for incident media storage.

Duplicate File Finder & Cleaner | Bash, Shell Scripting, Linux, MD5, CLI GitHub

- Created a Linux CLI tool in Bash using MD5 checksum hashing to recursively find duplicate files.
- Automated detection and safe deletion of empty folders and 0-byte files via interactive user prompts.

FoodieHub – Food Ordering System | PHP, MySQL, JavaScript, HTML, CSS GitHub

- Built a full-stack food ordering app with user authentication, dynamic cart management, and checkout.
- Designed an indexed MySQL database schema to handle order transactions and fast query lookup.

Education

Green University of Bangladesh Dhaka, Bangladesh
B.Sc. in Computer Science and Engineering (CSE) *2023 – Expected 2027*

- **Core Coursework:** Data Structures, Artificial Intelligence, Computer Networks, Operating Systems, Machine Learning, OOP.

Kerani Hat High School & College Rangpur, Bangladesh
Higher Secondary Certificate (HSC) – Science *2019 – 2021*

Certifications & Achievements

- **Intra Green Programming Contest (IGPC) 2026** | Participant, GUBPC *2026*
- **Cyber Hygiene Training** | The Asia Foundation & SAJIDA Foundation *Sep 2025*
- **Python (Django) Training** | Institute of Information Technology (IIT), Jahangirnagar University *Nov 2024 – Feb 2025*
