Professional Summary

Final-semester Computer Science and Engineering undergraduate interested in technical talent acquisition and learning recruitment processes. Uses C++ for algorithmic problem-solving practice and has basic, project-based exposure to programming, databases, and software development. Interested in applying this technical understanding to candidate profile reviews, coding assessment coordination, and recruitment tracking while developing communication and organizational skills.

Relevant Skills

Programming & Problem Solving: C++ (primary practice language); selected data structures and algorithms; LeetCode and Codeforces practice
Technical Fundamentals: Basic familiarity with Python, Java, SQL, OOP, client-server applications, REST APIs, and databases through projects
Productivity & Tools: Google Workspace, Microsoft Office 365, Git, GitHub (foundational/project exposure)
Recruitment Interests: Technical candidate sourcing, resume screening, coding-test coordination, applicant tracking, campus recruitment (areas of interest; not prior work experience)

Selected Technical Projects

Alert & Notification System *Java, Swing, Socket Programming*

- Built an academic client-server alert application using Java socket programming and multithreading concepts.
- Practiced handling multiple client connections and monitoring status with `ExecutorService`.

Cipher Vault – Client-Side Encryption Vault *Flask, MongoDB, JavaScript*

- Worked on a file vault project involving browser-side encryption, Flask APIs, user authentication, and database storage.

FoodieHub – Food Ordering System *PHP, MySQL, HTML/CSS, JavaScript*

- Created a project with login, user roles, cart features, and database-backed order workflows.

Duplicate File Finder & System Cleaner *Bash, Linux CLI*

- Created a command-line utility to find potential duplicate files using hashes and identify empty folders and files.

Smart Safety Awareness Network (SSAN) *JavaScript, Firebase, Supabase*

- Worked on a safety alert project with SOS notifications, interactive maps, and cloud-based data features.

Education

Green University of Bangladesh, Dhaka, Bangladesh 2023 – Present
B.Sc. in Computer Science and Engineering | Final Semester | Seeking Internship

Kerani Hat High School & College, Rangpur, Bangladesh 2019 – 2021
Higher Secondary Certificate (HSC), Science

Training & Activities

Python (Django) Training, 80 Hours – IIT, Jahangirnagar University Nov 2024 – Feb 2025
Cyber Hygiene Training – The Asia Foundation & SAJIDA Foundation Sep 2025
Intra Green Programming Contest (IGPC) – Participant 2026
